## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, drawn to making a device, classified in class 438, subclass 1+.
- II. Claims 36-50, drawn to a device, classified in class 257, subclass 296.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the device of the group II invention could be made by a materially different process than that of the group I method. For example, the group II device could be made by a process that does not form capacitors, that does not form first through third trenches or that does not form isolation parts. Also, the group I invention could be used to make a materially different product from that of the group II invention. Specifically, the group I invention could be used to make a device wherein the radius of curvature of the trench is less than 10 nm, or a device that is formed without first, second and third semiconductor regions, or a device that is not formed by using a selective etch process but is rather formed by selective deposition of different layers, or a device that is formed without a gate cap insulating film, or finally a device in which the source and drain regions are formed to the same depth.

Art Unit: 2815

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George C. Eckert II whose telephone number is (703) 305-2752.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Eddie Lee can be reached on (703) 308-1690. The fax phone number for this Group is (703) 308-7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
